

Complexity Minimized. Performance Optimized.

LEARN WHAT THUNDERCAT CAN DO FOR YOU

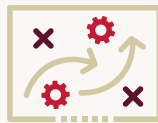

ThunderCat Technology is a Service-Disabled Veteran-Owned Small Business (SDVOSB) that delivers technology products and services to government agencies, educational institutions, and commercial enterprises. Specifically, ThunderCat is a systems integrator that brings an objective and innovative approach to solving customer problems in and around the data center including cloud transformations. We do this by providing strategies for data management, cloud computing, cyber security, networking, and governance. A proven leader, ThunderCat Technology provides and optimizes technologies from best of breed manufacturers.

ThunderCat, an SDVOSB with multiple contract vehicles, holds industry specific certifications and provides industry leading resources to help federal and commercial customers achieve their mission.

We are dedicated to being a premier trusted provider of Information Technology products and services by providing consistently superior performance, expertise, quality and integrity with a focus on our clients' mission. We are active with various veterans' charities and are founded and owned by a combat wounded veteran who truly believes in giving back to the community.

Solutions

Data Center

- Information Lifecycle Management
- Storage Solutions
- Converged Infrastructure
- Server, Desktop, and Application Virtualization
- Disaster Recovery and Business Continuity
- Performance and Configuration Management

Networking & Cyber Security

- Software-Defined Networking
- Microsegmentation
- WAN Optimization
- Assessment and Design Engagements
- Configuration Management
- CASB and SIEM Solutions
- Next-Generation Firewall
- Endpoint Security

Cloud Computing

- Private, Public, and Hybrid Cloud Strategies
- Migration Services
- Cloud Native Design Services
- Cloud Management Platforms
- Automation & Orchestration
- Desktop-As-A-Service
- Cloud Workshops
- Billing and Cost Optimization

Enterprise Applications

- Application Dependency Mapping
- Application Performance Management
- Microservices and Container Solutions
- Enterprise Visibility
- Business Intelligence
- Big Data, AI, and ML
- DevOps and DevSecOps

Capabilities

Data Center

ThunderCat has been specializing in data center infrastructure since its inception. ThunderCat represents, distributes, and integrates best of breed technologies enabling organizations to:

- Update and consolidate aging infrastructure
- Leverage Software-defined data center (SDDC) techniques
- Decrease operational expenses
- Monitor and manage performance and efficiency

Networking & Cyber Security

ThunderCat provides technical solutions and services to deliver upon the promise of next-generation firewall and advanced networking practices. We bridge the gap between technical and business requirements to deliver true business continuity and disaster recovery readiness.

Whether executing upon a cloud migration or a new data center consolidation project, ThunderCat provides the knowledge and expertise to create technical designs for cyber security and networking. This results in an IT infrastructure that will be relied upon as a business enabler rather than a technical limitation or liability.

ThunderCat provides expertise and partnerships to deliver WAN optimization, software-defined WAN (SDWAN), software-defined networking (SDN), next-generation firewall (NGFW), and microsegmentation solutions.

Cloud Computing

Our workshops and design services enable our customers to align cloud computing strategies to fit their business needs. Whether employing a private, public, or hybrid cloud approach, ThunderCat can provide migration assistance, cost controls, and governance. ThunderCat can also assist with automation and orchestration initiatives in order to drive operational efficiency.

Enterprise Applications

ThunderCat works alongside leading vendors on business-critical application integration, interoperability, security, and optimization. ThunderCat can provide Application Dependency Mapping (ADM) and Application Performance Management (APM) assessments for stand-alone, virtualized, containerized or cloud-distributed applications. This enables organizations to be confident in regard to the security, performance, and availability of their application components.

ThunderCat enables customers to leverage real-time data analytics to bring transparency to their data. By focusing on technologies that provide both real-time and batch analytics at scale, we enable the delivery of business intelligence.

ThunderCat provides the technologies that enable advanced methodologies such as Machine Learning (ML) and Artificial Intelligence (AI) to advance business capabilities.
